

### YSI-580 Yorco Medical Refrigerator

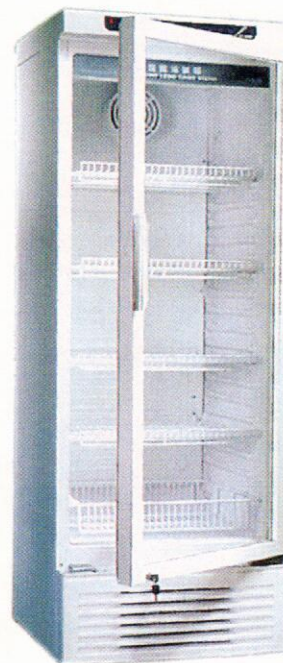

The Medical Refrigerator is a specialized refrigerating equipment for cold storage of pharmaceuticals, as well as biological products and so forth. It is suitable for hospitals, drugstore, pharmaceutical Industry, Blood Banks, Sanitary, Anti-epidemic station and clinics.

#### Salient Features :

- Ergonomic Design and user friendly Controls
- Microprocessor Control System
- Unique Cooling System
- Inert Gas insulation between the double glass doors
- Automatic and Manual control of inner lighting
- Adjustable shelves/partition for convenient storage and cleaning

#### Precise Temperature Control :

- (a) Microprocessor-based temperature control system; combined with two exact sensors and one sensor to defrost. Automatically turn on the compensatory heater based on the temperature change. A stable and accurate chamber temperature can be maintained at ambient temperature ranging from 0°C to 32°C.
- (b) Forced air circulation system with intelligent control ensures excellent temperature uniformity.
- (c) Automatic temperature control: 3-digit high luminance LED display of temperature with in the adjustable range of 2~10°C. The temperature with controlling precision 1°C and temperature displaying precision 0.1°C.
- (d) Perfect alarm systems, which provide numerous audible/visual alarm functions in case of high or low temperature condition, sensor abnormality, door power failure and so forth, to ensure the safety of storage.

#### Construction :

- (a) Exterior made from high quality structural steel sheet, painted by advanced coating technology after the anticorrosion treatment of phosphorization, The superficial luster is gentle, Interior made from ABS engineering plastics.
- (b) Dual-pane, inert gas insulated glass door, equipped with special lock, Four casters are mounted under the bottom.
- (c) Interior fluorescent lighting provides a clear view of stored items.
- (d) Shelves made of quality steel wire soaked with plastic provide convenient access to the stored articles and easy cleaning.

Capacity : 260 Ltrs.  
 Inside Temp. : 2°C ~ 10°C  
 External Dimensions : 600×600×155mm

Capacity : 300 Ltrs.  
 Inside Temp. : 2°C ~ 10°C  
 External Dimensions : 600×600×1750mm
